Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant and examiner discussed the prior art relied upon in parent case 09/941524. Applicant and examiner discussed proposed amendments to claims 1, 15 and 21 to distinguish the invention over Benton and Apparius. Specifically, the claims would be amended to indicate that the locating portion extends laterally beyond the main body, the main body has a greater length (i.e. taller) than the locating portion, and the main body has a triangular shape. Applicant also provided copies of additional affidavits to address the concerns raised in the Final Rejection made in 09/941524 (i.e. commercial success and long-felt need).
